Configuration of your screen to run the project

To configure the screen to assure the RPA finds the correct buttons and coordinates we must follow the next steps.

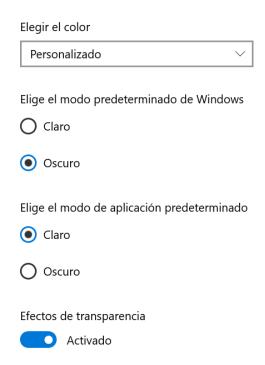

1. Right click in our desktop and then left click in "Personalize"

2. Click on "Colors"

3. Select the following options. (Same for English and Spanish)

4. Then we must go back to our desktop, right click and then select "Screen configuration"

5. Finally scroll down until we find "scale and distribution" and select 150%

Pantalla

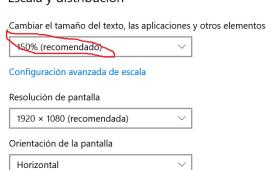

Configuración de la luz nocturna

Windows HD Color

Disfruta de una imagen más brillante y dinámica para vídeos, juegos y aplicaciones que admiten HDR.

Configuración de Windows HD Color

Escala y distribución

Now you are ready with the configuration of your screen
